ATTN :

25X1

Chief, Military-Scientific Division, PIC

Requirement SI/HT/R45/58

1. A search of photography of the BAKU area failed to reveal the existence of the subject installation. Heavy cloud cover and haze, however, precluded a complete scan of the area in and around BAKU.

2. The date of the photography used was [redacted] and it is suggested that this is another limiting factor in identifying the subject installation.

25X1

3. A cursory search of collateral intelligence failed to provide any leads on possible locations of the installation.

4. It is requested that this project be cancelled.
